

Jongseon Park 박종선

M.S.–Ph.D. Integrated Program · **Department of Artificial Intelligence, Hanyang University**

jongseon96@hanyang.ac.kr · github.com/jongsun968-maker · jongsun968-maker.github.io · Republic of Korea

RESEARCH INTERESTS

My research centers on **reinforcement learning**, **model-based RL**, **world models**, and **robotics AI** — in particular, energy-efficient autonomous robot control and safe, robust decision-making in real-world environments. Current work includes energy-optimal locomotion for quadruped robots adapting to changing ground friction, energy-aware autonomous navigation for mobile robots, physics-constrained RL with sim-to-real transfer, and medical microrobotics: CT/X-ray-based 3D perception, autonomous intravascular navigation, and world-model-based planning for safe control.

Reinforcement Learning · Model-Based RL · World Models · Embodied AI · Robot Learning · Autonomous Navigation · Motion Planning · Sim-to-Real Transfer · Energy-efficient Robotics

EDUCATION

2025 — Present — **Hanyang University**, Seoul, Korea
M.S.–Ph.D. Integrated Program, Department of Artificial Intelligence

— 2019 — **Hankuk University of Foreign Studies**, Yongin, Korea
B.S. in Industrial & Management Engineering

PUBLICATIONS & AWARDS

Fraudulent Ticket-Booking Detection for SRT High-Speed Rail (poster)
Jongseon Park et al. · Korean Data Mining Society (KDMS)
🏆 **Grand Prize — Best Paper Award**

SwiftAlert: A Low-Latency Disappearance Detection Pipeline via Streaming Spatio-Temporal LOF (poster)
Jongseon Park et al. · ACM UbiComp
In preparation

EXPERIENCE

Sep 2022 — Jun 2025 — **SAFETICS** · Pro
Seoul, Korea

- Planned UI/UX for SafetyDesigner, a customer-centric 3D robot-safety simulation program.
- Contributed as a core planner from the earliest project stage, setting outcome-oriented goals through a successful launch.
- Extracted customer data with SQL; analyzed and visualized monthly user and usage patterns with Python; authored monthly usage reports.

Mar 2019 — Jun 2022 — **ROK Army Special Warfare Command** · Company Executive Officer
Icheon, Korea

- Executive officer of a company in the 707th Special Mission Group; strengthened strategic leadership and teamwork.
- Led a successful combined training exercise with the U.S. Green Berets.
- Selected as Top Team among elite special-forces companies in Korea.

TRAINING & COURSES

Dec 2024 — Present — **Python Machine Learning**
LearningSpoons

Jul — Aug 2022 — **H-Mobility Class 2022 — Robotics Track**
Hyundai Motor Group

Jan — May 2022 — **Collaborative Robot SI Training Program**
Kwangwoon University

CERTIFICATIONS

Sep 2021 — **Advanced Data Analytics Semi-Professional (ADsP)**
Korea Data Agency

Aug 2021 — **Engineer, Quality Management**
Human Resources Development Service of Korea

Nov 2020 — **Engineer, Industrial Safety**
Human Resources Development Service of Korea

SKILLS

Programming	Python, PyTorch, SQL, R
Analysis	SPSS, statistical analysis, data visualization
Tools	Figma, Notion, Git/GitHub
Languages	Korean (native), English
